EYC Smart Attendance System V1 Testing & Feedback Meeting Agenda

Thank you all for making time. This agenda sets out how we would like to use the session to try out V1 together and decide what comes next.

Meeting Information

Date	Saturday, 24 October 2026
Time	6:00 PM planned to finish at 7:30 PM; we can extend to 8:00 PM if testing or discussion needs it
Format	In person
Location	Youth School Office
Participants	Project manager / project proposer and project team members
Project stage	Main V1 implementation completed; testing, feedback, and improvement discussion

Objectives

The main V1 implementation is complete. This meeting is about checking it with real use and agreeing on next steps, not about restarting planning. We would like to:

1. Show what the team has built in V1.
2. Test the main workflows together, hands-on.
3. Hear feedback from the project manager and the team on usability, usefulness, and missing features.
4. Hear about the team's development challenges, lessons learned, and suggestions.
5. Discuss possible improvements and agree on next steps.

What We Will Look At

We will demonstrate and test the main V1 workflows:

- Staff registration and first-time login in the Telegram Mini App, and returning to a signed-in session.
- GPS location check and QR code scanning for check-in and check-out, including the on-time or late status.
- Personal attendance history for staff.
- The admin web dashboard: viewing attendance, managing staff, and exporting the monthly Excel report.

- A few failure cases, such as trying to check in from outside the allowed area.

The automatic check-out and three-strike rule in the original requirements is not part of V1 and will not be tested. We list it below as a possible discussion item for the future.

Agenda

Time	Duration	Item	What happens	Led by
6:00–6:05 PM	5 min	Welcome and goals	Purpose of the meeting, plan for the evening, and what V1 includes	Facilitator
6:05–6:20 PM	15 min	V1 demonstration	One complete walk-through: staff registration to check-in, then the admin dashboard	V1 team
6:20–6:50 PM	30 min	Hands-on testing	Everyone tries the main workflows; problems and confusing moments are noted	All participants
6:50–7:02 PM	12 min	Feedback	The project manager's impressions first, then the rest of the group	Project manager and all
7:02–7:10 PM	8 min	Development challenges and lessons learned	Team members share what was difficult and what they learned	V1 team
7:10–7:20 PM	10 min	Improvement ideas	Suggestions for features, workflow changes, or technology, sorted by type and priority	All participants
7:20–7:30 PM	10 min	Decisions and next steps	Agree on what to fix now, what to investigate, and what to leave for later, and who follows up	All participants

If we need extra time, up to 30 minutes will be added mainly to hands-on testing and discussion, ending by 8:00 PM.

Discussion Topics

- **Usability:** Is the workflow practical for teachers and staff? Is anything confusing or unnecessarily complicated?
- **Fit for purpose:** Does the system meet the needs of the project? Do the dashboard and the Excel report give what is needed?
- **Issues found:** What problems or missing functionality did we find during testing?
- **Team experience:** What challenges did the team face, and what would we do differently?
- **Future ideas:** Which features, workflow changes, or technologies might be worth considering later?

- **Possible future item:** Whether the automatic check-out and three-strike rule from the original requirements should be built, changed, or dropped.
- **Priorities:** What is the single most important improvement, and what should be fixed before real staff use the system?

How We Will Run the Session

- Please bring a smartphone with Telegram installed, since the staff side runs in the Telegram Mini App.
- During testing, we will write problems down rather than fix them on the spot.
- New ideas are welcome. We will note and sort them, and not every idea needs to be decided tonight.
- We will keep to the times above so that there is room for decisions at the end.

Expected Outcomes

1. The project manager and team have tried the main V1 workflows themselves.
2. A written list of bugs, usability problems, and suggestions from testing and discussion.
3. A clear view of what works well and what needs improvement.
4. Each item sorted into: fix now, investigate later, consider for a future version, or not needed.
5. Agreed next steps, including who follows up on each item.
6. A short smmary sent to all participants after the meeting.
